

Gauge Carrier

PPS gauge carriers are machined from one solid metal bar to hold one to four gauges. The carriers are designed for measuring internal and/or external pressures. Other sizes and/or types of carriers are also available upon request.

Applications:

- Drill Stem Testing
- Stimulation Monitoring
- Well Testing
- Injection Monitoring
- Reservoir Studies
- Perforation Monitoring

Specifications

Characteristics

Outside Diameter—inches	5" (127 mm)
Inside Diameter—inches	2.25" (57 mm)
Length—inches	79.5" (2019.3 mm)
Pressure Rating—Burst	22,000 psi (150 MPa)
Pressure Rating—Collapse	21,000 psi (145 MPa)
Tensile Strength	470,000 lbs (220,000 kgf)
Material	AISI 4140
Thread Type	3 1/2" IF Box x 3 1/2" IF Pin
Weight	237 lbs (108 kg)
